EDUCATION

Bachelor in Computer Science
Polytechnic Institute of Braganca
2020 - 2023

High School in Science
National School of Science, Nepal
2017 - 2019

Secondary School
Oxford Secondary School, Nepal
2006 - 2016

SKILLS

- React, React Native, Next JS, Redux, Tailwind, ShadcnUI

- Git, Gitlab, Github

- Javascript, Typescript

- Nodejs, Express, REST APIs, GraphQL, MVC, Postman

- MySQL, Postgres SQL, Firebase, MongoDB

ABOUT

Fresh graduate with a Bachelor's in computer science and Highly skilled Frontend and Backend Web (MERN Stack) and Mobile Developer (React Native) with 2 years of experience in front-end development for web and mobile applications and 1+ year of continuous learning and growth in backend development using Node. Seeking a challenging role that allows me to leverage my expertise in React, Node, API development, and a wide range of technical skills to create exceptional digital products.

CERTIFICATIONS

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno)

Proficient in Node.js, specializing in modern server-side web applications, REST APIs, and GraphQL APIs. Strong grasp of the Node.js ecosystem and experience with Deno.js.

React, NodeJS, Express & MongoDB - The MERN Fullstack Guide

Acquired skill in connecting ReactJS with NodeJS, Express, and MongoDB to build projects from scratch. Proficient in authentication, authorization, and file upload integration in web applications
https://res.cloudinary.com/dmpfnj9yi/image/upload/v1677807646/UC-c100e915-025b-4bb4-b8e3-0984a012f43e_lkuonp.jpg

The Complete Web Developer in 2023 - Zero To Mastery

Skilled in React + Redux for dynamic front-end apps, with expertise in full-stack development using Node.js, Express, SQL, and PostgreSQL. Proficient in user authentication and JavaScript.

WORK EXPERIENCE

Frontend and Mobile Developer (2 years):   09/2022 - 07/2023
Portfuse | Kathmandu, Nepal (Remote)

It's an IT service provider startup started by 6 university friends to provide IT services and products to small-scale businesses within Nepal. And here are my tasks and responsibilities:

- Developed highly performant and user-friendly web and mobile applications using JavaScript (ES6), React, and other frontend technologies.
- Collaborated closely with UI/UX designers to ensure the implementation of engaging user interfaces.
- Troubleshooted real-time issues, optimizing code for maintainability and performance. - Utilized Linux, Git, Slack, and Postman for development and testing processes. - Contributed to defining solutions and architecture for mobile applications.
- Worked with RESTful API services, HTTP(S) protocol, mocking, and caching for network communication.
- Implemented front-end testing and followed clean code principles.
- Gained experience with CI/CD tools, particularly GitLab.
- Actively participated in Agile methodology, promoting continuous improvement and collaboration.
- Demonstrated a passion for delivering great digital products and services.

- Web Application Development & Mobile App Development

- Communication, Team work, English

- ORM/ODM: Sequelize, Mongoose

Freelancer (Frontend Development): 2020 - present
Upwork l Remote

Involved in freelancing in the Upwork platform since 2020 so I can get some small-scale Front End Web Development Projects. Here are the knowledge and experience I acquired:

- Independently designed and built web and mobile applications for clients.
- Demonstrated expertise in JavaScript, CSS3, and HTML5.
- Ensured optimal performance and adherence to UI/UX design principles.
- Implemented REST API and web application development for client projects.

Freelancer (Backend Development): 2023 - present
Upwork l Remote

Involved in freelancing in the Upwork platform since 2023 so I can get some experience in Back End Web Development Projects. Here are the knowledge and experience I acquired:

- Designed RESTful and GraphQL APIs, using Node.js and Express.js.
- Employed [specific databases used, e.g., MongoDB, MySQL] for efficient data storage.
- Implemented authentication and authorization for secure API endpoints.
- Collaborated with front-end developers for seamless integration.
- Conducted performance optimization and real-time troubleshooting.
- Maintained codebase, addressing security and compatibility concerns.
- Kept current with industry best practices and emerging technologies.

Final Project (React Native and Firebase): 07/2023 - 09/2023
IPB l Braganca

As a developer, I wanted to explore React Native and Firebase using expo tools so as my Bachelor's Final Project I chose React Native and Firebase Multiplatform Mobile Application Development. Here are my tasks and responsibilities:

- Successfully completed a comprehensive final project during my bachelor's program to explore mobile app development using React Native and Firebase.
- Developed a feature-rich mobile application using React Native, harnessing its cross-platform capabilities.
- Utilized Firebase for real-time data storage, including the Realtime Database and Cloud Storage, to enhance user experiences.
- Leveraged Expo and Expo tools for streamlined development and testing workflows.
- Implemented REST APIs for handling backend endpoint calls, enhancing the app's functionality and data exchange.
- Collaborated with a team of peers to deliver a polished and functional mobile application.
- Gained valuable experience in mobile app development, Firebase integration, and REST API usage.
